

The radar chart displays the performance of five AI models across five categories. The categories are Text Rendering, Art & Design, Photorealistic Imaging, Complex Semantics & Reasoning, and World Knowledge. The models are Qwen-Image-2.0-Pro (2K) (red), Z-Image Turbo (purple), Kling Image 3.0 Omni (2K) (brown), Seedream 5.0 Lite (2K) (orange), and an unlabeled pink line. The chart shows that the pink model is the strongest in Art & Design and Photorealistic Imaging, while Qwen-Image-2.0-Pro is strong in Text Rendering and Complex Semantics & Reasoning.

Model	Text Rendering	Art & Design	Photorealistic Imaging	Complex Semantics & Reasoning	World Knowledge
Qwen-Image-2.0-Pro (2K)	0.75	0.65	0.55	0.75	0.65
Z-Image Turbo	0.70	0.85	0.60	0.65	0.70
Kling Image 3.0 Omni (2K)	0.65	0.60	0.50	0.60	0.65
Seedream 5.0 Lite (2K)	0.60	0.75	0.55	0.60	0.60
Unlabeled Model (Pink)	0.65	0.90	0.65	0.60	0.65

The radar chart displays the performance of Qwen-Image-2.0-Pro across seven editing categories. The performance is measured on a scale from 0.2 to 0.7, with concentric dashed circles representing increments of 0.1. The chart shows that Qwen-Image-2.0-Pro performs best in Identity & Reference editing (approx. 0.55) and Style & Lighting Editing (approx. 0.52), while its performance is lowest in Multi-image Editing (approx. 0.35) and Local Editing (approx. 0.32).

Editing Category	Qwen-Image-2.0-Pro Performance (approx.)
Multi-image Editing	0.35
Advanced Editing	0.45
Identity & Reference	0.55
Style & Lighting Editing	0.52
Object & Scene Editing	0.48
Text Editing	0.42
Local Editing	0.32

A radar chart comparing GPT-4's performance across five categories. The chart features five axes radiating from a central point, each representing a different task. Concentric dashed circles are drawn at intervals of 0.2, ranging from 0.2 to 1.0. A solid blue line connects the data points for each category, and the area within this line is filled with a light blue color. The 'Text Editing' category shows the highest performance, followed by 'Content Generation & Replacement' and 'Advanced & General'. 'Operations' and 'Information' show lower performance levels.

Category	Performance Score (approx.)
Content Generation & Replacement	0.7
Text Editing	0.8
Advanced & General	0.6
Operations	0.4
Information	0.4

The radar chart displays the distribution of 120 design graduates across 12 design disciplines. The chart features 12 axes, each representing a design field, and concentric dashed circles indicating the number of graduates from 0 to 1.0. The data is represented by a solid blue line and a light blue shaded area.

Design Discipline	Number of Graduates (approx.)
Education & Academia	0.25
E-commerce Design	0.85
Business & Office	0.75
Architecture	0.85
Tech & Engineering	0.65
Social Media Marketing	0.85
Publishing & Media	0.75
Portrait Photography	0.70
PPT Presentations	0.85
Lifestyle & Leisure	0.70
Graphic Design	0.85
Film Storyboarding	0.85
Fashion & Beauty	0.85
